

# Neutrinos Agentic AI Composer -

Powering the Future of Automation

# Transform AI Automation with Intelligent Agents

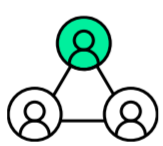

Neutrinos Agentic AI Composer is the next-generation **Agentic Automation engine** that enables businesses to build, manage, and orchestrate **intelligent AI agents** with seamless decision-making capabilities. From **LLM-powered virtual assistants** to **multi-agent workflows**, the future of automation is here.

## Business Benefits

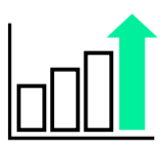

### Smarter AI Decisioning

Automate document processing, underwriting, claims adjudication, and risk assessment using AI-powered decisioning.

### Multi-Agent Collaboration

Enable multiple AI agents to work together, coordinating tasks, analysing data, and making automated decisions.

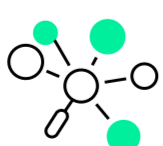

### Enhanced Efficiency

Reduce manual intervention and streamline complex business workflows with intelligent automation.

### Faster Time-to-Market

Deploy pre-built AI agents and fine-tuned LLMs for quick implementation and accelerated automation.

### Seamless Omni-Channel Engagement

Deliver AI-driven conversational experiences and workflow automation across web, mobile, WhatsApp, Teams, and more.

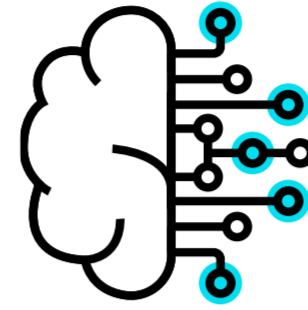

# What's Inside?

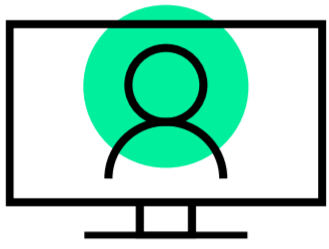

## Agentic Intelligence

**Agentic Extraction**– Extract and structure text and document-based data for automation.

**Agentic Prediction**– AI-powered classification and forecasting for data-driven decision-making.

## LLM-Powered AI Agents

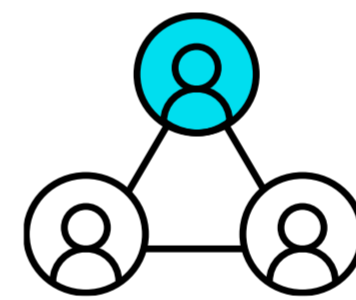

**Conversational AI**– Integrate with OpenAI, Google Gemini, Mixtral, & other LLMs for smart interactions.

**Fine-Tuned LLM Models**– Train enterprise-specific AI models for accurate, contextual insights.

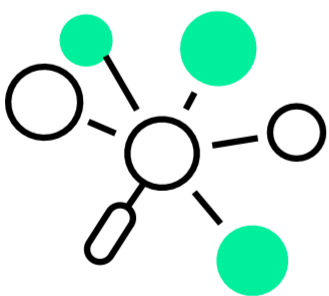

## Multi-Agent Orchestration

**Pre-Built AI Agents**– Access a ready-to-use AI agent library for rapid deployment.

**Cross-Agent Collaboration**– Enable multiple AI agents to work together for complex workflows.

## Omni-Channel AI Deployment

Deploy across **Web, Mobile, WhatsApp, Teams, Slack, and more.**

Deliver a **seamless AI experience across platforms.**

## Enterprise-Grade Security & Compliance

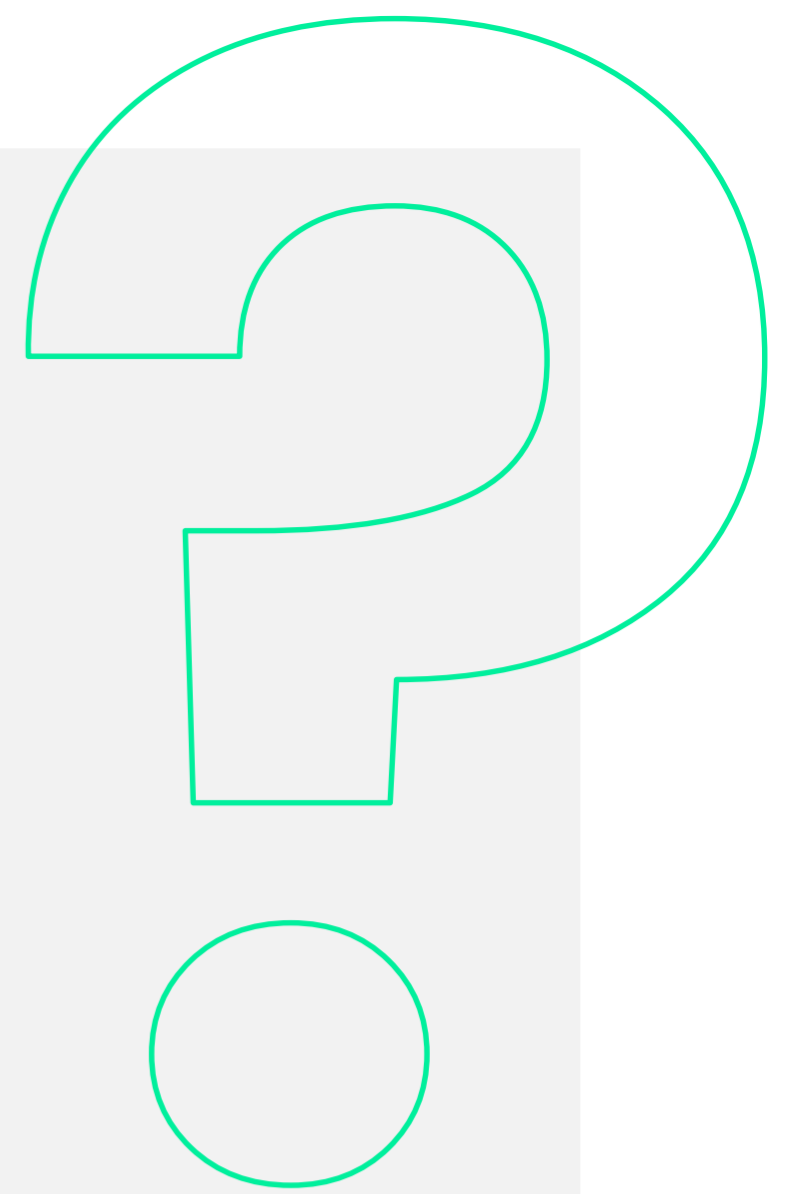

**RBAC & Role-Based Access Controls** to manage AI workflows.

**Built-in Compliance** with **GDPR & HIPAA** to secure enterprise data.

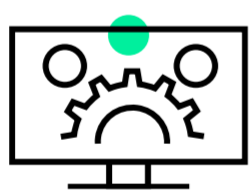

## Where Can It Be Used?

- **Underwriting AI Assistants:** Automate risk assessment & decision-making for insurers.
- **Claims Processing & Fraud Detection:** AI-powered claims assessment, fraud detection, and automation.
- **Intelligent Virtual Assistants:** AI-driven customer support, lead qualification, and recommendations.
- **Medical Summarization & Case Analysis:** AI-powered document summarization and insights extraction.
- **Finance & Expense Management:** Automate expense categorization, invoice processing, and forecasting.
- **Multi-Agent Workflows:** Enable AI agents to collaborate for adjudication, compliance, and policy recommendations.

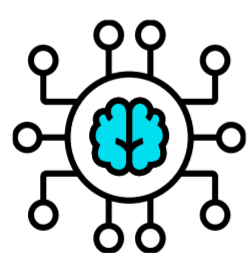

## Why Neutrinos?

### **Bringing AI, Data Orchestration, and Intelligent Automation**

**Together:** Unlike fragmented solutions, Neutrinos unifies AI agents, automation, and pre-built insurance solutions, enabling teams to seamlessly orchestrate data across systems.

**AI Agents Designed for Insurance:** More than just Generative AI chatbots, our AI agents understand underwriting, claims, and policy workflows, freeing up team bandwidth while autonomously completing tasks, surfacing insights, and making pre-approved decisions.

**Enterprise-Grade Security for Insurance:** Built with SOC 2 Type II and ISO 27001 compliance, Neutrinos ensures insurers can deploy AI confidently while meeting strict industry security and regulatory standards.

## About Neutrinos:

Neutrinos is a technology company that automates business processes for insurance enterprises. The Neutrinos AI-infused intelligent automation platform includes everything needed to design, automate, and optimize complex processes end to end. Our holistic insurance expertise, intelligent automation platform, and pre-built accelerators, help leading insurers accelerate their enterprise reinvention across underwriting, claims, and distribution – resulting in faster growth and superior omni-channel experiences.
