

Neutrinos' Connected Claims Accelerator

Reimagine claims and drive seamless processes from intake to settlement while reducing leakage

Neutrinos Connected Claims accelerator built on our Intelligent Automation Platform enables reimagined claims management for insurance carriers, MGAs, brokers, and agencies; and experiences that digitally engage customers, reduce claims leakage, and creates efficiencies across the entire claims lifecycle - from First Notice of Loss (FNOL) through adjudication and fraud detection, to settlement and payout. With flexible integration capabilities and industry-specific rules libraries, Neutrinos connects your entire claims ecosystem.

Elevating Claims Management with Neutrinos

Unify Claims Data
for a 360-Degree View

Accelerate Time to Settlement &
Reduced Claims Leakage

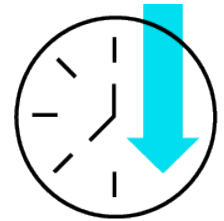

Deliver a Modern, Connected
Customer Experience

Connected Claims Capabilities

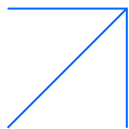

- ✎ **Claims Intake And FNOL:** Streamline multi-channel claim submissions with AI-powered categorization, prioritization, and integrated document extraction for efficient processing.
- ✎ **Claims Registration & Verification:** Validation of policy status and coverage details through AI, intelligent document processing (IDP) and flexible system integration, including reinsurers and third-party systems.
- ✎ **Auto Adjudication:** Leverage advanced analytics, predefined rules libraries for various Lines of Business (LOBs), risk calculation/flagging and integrated fraud detection models to automatically process straightforward claims.
- ✎ **Adjudication Workbench & Assessment:** Empower adjusters with a 360-degree claim view, integrating all relevant data with AI-enabled decision-making and complex case handling.
- ✎ **Settlement and Closure Management:** Automate benefit calculations and payment disbursement while ensuring regulatory compliance throughout the settlement process.

Real Results, Real Impact

A leading insurer leveraged Neutrinos Connected Claims to streamline their claims processes, resulting in up to 50% reduction in processing time, significant decreases in operational costs, and notable increases in customer satisfaction scores.
