

Property & Casualty Insurance

Automate underwriting, streamline distribution, and digitize policyholder experiences.

Leverage Neutrinos' AI-powered platform to automate the full quote-rate-bind process, modernize the servicing lifecycle, accelerate claims processing, and enhance customer and agent experiences. Our solution helps P&C carriers, MGA's, agencies, and brokers reduce cycle times, improve loss ratios, create efficiencies, and drive profitability across both personal and commercial lines.

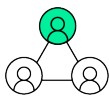

Automate smarter, accelerate outcomes, and optimize every business function

Boost Productivity & Business Agility: Automate key tasks with IDP, ensuring faster, more efficient workflows across from initial underwriting through claims.

Enable Seamless Experiences: Provide stakeholders with real-time access to services and data for streamlined, modern experiences.

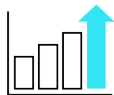

Eliminate Silos and Integrate Your Ecosystem: Break down silos between teams, improving internal coordination and external partner management.

Purpose-Built for P&C Insurance

- ✎ **Auto Claims Automation:** End to end auto claims - Loss notification, Claims registration, Fraud management and settlement through single automation platform driving higher STP, efficiencies.
- ✎ **Agent & Customer Portals:** Modern portals to enhance agent and policyholder experiences, accelerating new business cycles, improving conversion rates, and driving premium growth across all distribution channels.

- Omni-Channel Quote to Buy to Service:** An omni-channel accelerator for customers to shop auto, accident, and many other short-term insurance products, to manage their policies, file claims, request roadside assistance, find hospitals or agents or auto body shops, clarify queries, track existing claims across any device, anytime and anywhere. The accelerator can also be extended for use by agent/brokers and bancassurance channels.
- Intelligent Underwriting:** Leverage GenAI and pre-built automations to summarize cases, automate ICD-10 mapping, optimize workflows, flag risks, and streamline processes for faster, seamless decisions.
- Product Configuration:** Easily configure byte size products for travel, cyber, pet, and other insurance product types, leveraging the Neutrinos rules engine for insurance to launch new products in hours and days.

Why Choose Neutrinos?

Business Outcomes Focused:

We build trust through understanding your unique challenges, aligning with your objectives, and fearlessly driving results. Our approach and passion for delivering business impact helps you achieve nimble, efficient operations and world-class customer experiences.

Building on Past Investments:

Don't lose the value of your past technology investments. Maximize ROI by adding modern capabilities that seamlessly integrate with and enhance your existing technology systems. Uplift legacy technology system investments and reduce tech debt by leveraging our powerful innovative platform.

Insurance Expertise that Delivers Results:

Our team combines deep insurance industry experience with proven technical prowess to tailor digital automation solutions that address the evolving needs of insurers. Gain peace of mind with a team committed to accelerating your business agility and enhancing the customer experience.

Comprehensive Transformation Approach:

Fixing challenges piece-meal and in one part of the enterprise and disparate solutions scattered across the enterprise only make digital transformation harder for insurers. Our enterprise-wide reinvent approach and AI-powered digital automation platform can transform processes across multiple disciplines ranging from distribution to underwriting to claims.

Embed Intelligent Automation into Your P&C Insurance Business

About Neutrinos:

Neutrinos is a technology company that automates business processes for insurance enterprises. The Neutrinos AI-infused intelligent automation platform includes everything needed to design, automate, and optimize complex processes end to end. Our holistic insurance expertise, intelligent automation platform, and pre-built accelerators, help leading insurers accelerate their enterprise reinvention across underwriting, claims, and distribution – resulting in faster growth and superior omni-channel experiences.
